MD DILSHAD AKRAM

Howrah, India | +91-9330071153 | dilshadakramnew@gmail.com
GitHub: https://github.com/mohammadDilshadakram | Portfolio: https://mohammaddilshadakram.github.io/portfolioDilshad/

PROFESSIONAL SUMMARY

Software Engineer with data analytics expertise, skilled in Java, Python, SQL, and full-stack development. Experienced in backend services, REST APIs, and data-driven solutions.

EDUCATION

Bachelor of Technology (B.Tech) – Computer Science & Engineering (AI Specialization)
Techno India University, West Bengal | CGPA: 7.63 2022-2026

Higher Secondary (Science)
Howrah St. John's High School | Score: 85% 2021

TECHNICAL SKILLS

- **Programming & CS Fundamentals:** Java, Python, SQL, OOPs, Operating Systems, Computer Networks
- **Backend & Web:** RESTful APIs, Node.js, HTML, CSS, JavaScript, Next.js, Express.js
- **Data & Analytics:** SQL Queries, KPI Reporting, Data Cleaning, EDA, Power BI, Excel, Data Visualization
- **Databases:** MySQL, PostgreSQL, MongoDB (basic)
- **Tools & Practices:** Git, GitHub, SDLC, Agile, Unit Testing

PROFESSIONAL EXPERIENCE

Software Engineering Virtual Experience (Forage) – Electronic Arts Nov 2025

- Simulated the full software development lifecycle (SDLC) for the EA Sports College Football game, including feature implementation and debugging.
- Created technical documentation (class diagrams) and optimized C++ codebases to improve system performance, mirroring enterprise workflows.

Technical & Data Projects

AI LMS Course Generator (Academic Project)

- Developed a full-stack AI-driven course and quiz generation platform, implementing backend REST APIs, database integration, and secure application workflows.
- Engineered backend services, REST API integrations, and database connectivity for structured data handling.
- Implemented secure application flow and unit testing to ensure platform reliability.

Loan Risk Minimization – Financial Analytics System

- Analyzed financial datasets related to loans and deposits to support risk assessment models.
- Performed data cleaning, validation, and exploratory analysis (EDA) using SQL and Python.
- Designed Power BI dashboards with KPIs and drill-down views to visualize financial trends.

Bureaucrat AI – Document Automation Tool (First Runner-Up Solution)

- Built automation scripts and API integrations to streamline document handling workflows and optimize backend processing.
- Designed a modular architecture to support automated extraction and organization of information from PDFs, reducing manual effort.

ADDITIONAL ATTRIBUTES

- Languages Known: English, Hindi
- Soft Skills & Interests: Strong Communication, Team Collaboration, Problem Solving, Critical Thinking, Content Writing
- Certifications: Operating Systems (Udemy), Excel & Power BI, AWS Academy Cloud Foundations
- First Runner-Up – AIvolution Hackathon (IIT Kharagpur & Techno Billion AI)
